PROFESSIONAL-GRADE TUBING. ALWAYS ON HAND.

Grote’s Bulk Nylon Air Brake Tubing is trusted by professionals for its strength, flexibility, and dependable performance in demanding air brake and pneumatic systems. Built to meet or exceed SAE and DOT standards, it’s tough enough for the road, yard, or job site.

Now available in popular diameters and convenient 50-foot rolls, this tubing is perfect for quick, on-the-spot repairs. Packaged in a retail-friendly polybag, it’s easy to store, grab, and use—so you’re always ready to get the job done fast.

MATERIAL: UV/OZONE RESISTANT NYLON
OPERATING TEMPERATURE:
-40°C (-40°F) TO 93°C (200°F)
COLOR: BLACK
STANDARDS: SAE J844
REGULATIONS: FMVSS 571.106, FMCSA 393.45

AVAILABLE NOW IN KEY SIZES
3/8" Outside Diameter: the versatile work-horse for standard air brake applications.
1/2" Outside Diameter: for high-volume air delivery and main line routing.

Each size comes in **50' rolls**—perfect for fleets, maintenance shops, and OEM applications that demand flexibility and efficient inventory management for quick repairs and installations.

FEATURES & BENEFITS

- Meets SAE J844 & DOT FMVSS 106 requirements for air brake systems
- Rugged nylon construction resists abrasion, cracking, and chemical exposure
- Consistent performance in temperatures from -40°F to 200°F
- Smooth interior walls for optimal airflow and reduced pressure drop
- Compatible with industry-standard push-to-connect and compression fittings
