## NOT ALL WARNING LIGHTS ARE CREATED EQUAL

Grote's snowplow lighting products are engineered to capture the attention of motorists and pedestrians and warn of a potentially dangerous activity or situation. Our optical warning devices are designed for maximum visibility and meet or exceed TAC standards for mini lightbars, warning sticks and LED beacons.

### ONTARIO & MANITOBA

AMBER/BLE SNOWPLOW KIT, CLASS I, S-LINK

AMBER

BLUE

INCLUDES	DESCRIPTION	QUANTITY

### S-LINK™ TECHNOLOGY

S-Link™ System is a proprietary technology that allows us to synchronize warning and hazard LED products to comply with any and all flash pattern standards. Grote Heavy Duty Snow Plow lighting products are programmed and synchronized to ensure that the flash patterns and colours meet or exceed TAC requirements.

*Note: Only S-Link compatible products can be synchronized together.*
